

Serial No. 10/053,763

REMARKS

1. This paper is responsive to the office action of August 13, 2003.

5 2. In brief, the present invention is an AC electrical adapter.

10 3. The drawings were objected to under 37 C.F.R. § 1.83(a) since the drawings must show every feature of the inventions specified in the claims. The Examiner stated that, "Therefore, the a computer with power supply as recited in claims 15-21 and display, keyboard, mouse etc., recited in claim [18], must be shown or the feature(s) canceled from the claim(s)." Claim 18 has been canceled, and the computer has been canceled from claims 15-17, and 19-21 to remove this objection.

15 4. Claims 1-21 were rejected under 35 U.S.C. § 112, first paragraph, as failing to comply with the enablement requirement. The Examiner stated that, "The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is not clear where support for 'allowing movement in at least one axis within a plane parallel to a plane of the portion of said chassis to which said electrical adapter is configured to connect' as recited in claim 1, is found in the specification. It is also noted that the claim positively recites the adapter and not the chassis."

20 25 However, applicant respectfully notes that in the specification at page 3, lines 18-21, the application states that, "The adapter may then move up and down, or side
